

IFLEX WATERPROOF LED STRIP LIGHT | RGB

RGB COLOUR CHANGE | 12V | 24V

LRFWP

iFlex RGB is a low voltage, colour changing flexible LED strip lighting system, encapsulated in an optically clear, UV stabilised silicone. It contains high power 5050 tri-chip LED modules and can produce up to 16 million colours when coupled with DMX or WiFi LED controllers.

iFlex waterproof LED strip is rated IP67 waterproof and is designed for installation in outdoor areas and wet locations. Waterproof iFlex LED strip light is supplied in a 5m coil, with a 200mm cable for electrical connection at each end.

iFlex waterproof strips can easily be cut to length. We strongly recommend use of solder free connectors to provide water tight seals on cut runs. Not only do these save a significant amount of time during installation, but also provide a reliable weather proof seal.

Key Specification

Length	5m
LED Dimension	5.0 x 5.3 x 1.6mm
LED Beam Angle	120 degrees
Cuttable	3 LEDs (12V), 6LEDs (24V)
LED Quantity	60/m
LED Spacing	16.6mm
Working Voltage	12V DC / 24V DC
Power Consumption	Max 14.4W/m
Warranty	2 Year Warranty

Product	Colour	CCT	Voltage	IP Rating
RGB	RGB	  	12V / 24V	IP67

ACCESSORIES REQUIRED

- Power Supply
- Diffuser Profile
- Joiners
- Extended Tail
- Remote
