## Product Dimension

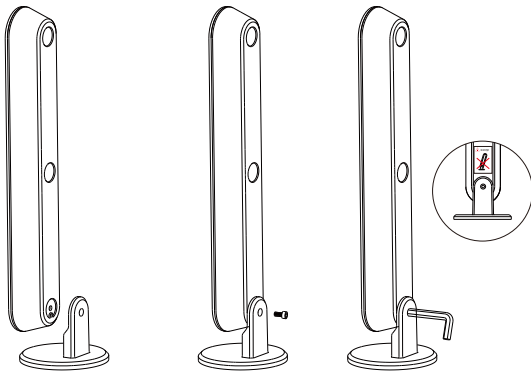

## Attention

1. Make sure WIFI signal stable and running at 2.4G Hz of frequency. If the lights not react to the operation, it might be caused by the unstable WIFI signal. Please wait and operate again after the WIFI signal become normal.
2. Please pairing the smart ambient lamp with the APP via WIFI signals and operate according to the user manual.

## Installation diagram

### Solution 1: Vertical type

1. Align the screw holes between the bottom of the lamp and the base, keep the lamp alignment with the supporter on the base.
2. Insert the screw into the screw holes, and tighten the screw using a hexagon wrench.
3. Doublecheck if the bottom of the lamp has been well appressed with the supporter of the base.
4. Please do not rotate the lamp once the lamp has been locked into the base.

### Solution 2: Adhesive

1. Tear off the self-adhesive paper from the 3M tape, and paste the 3M tape onto the dimple at the back of the lamp.
2. Wipe and clean the surface of the object, and paste the lamp onto the object.
